

## **Battle Hymn of the Atom (Power for the People)**

(Battle Hymn of the Republic)

### **Verse 1**

Mine eyes have seen the consequence of burning so much coal  
The filthy smoke on which we choke exacts a tragic toll  
But now we have technologies to make the planet whole  
And Nuclear leads the way

### **Chorus**

Power, power for the people  
Power, power for the people  
Power, power for the people  
The Atom Makes us Strong

### **Verse 2**

Renewables alone portend a future filled with pain,  
A hotter planet as they must be partnered with methane.  
This vision over fission would be patently insane  
Have Nuclear Show the Way

### **Chorus**

Power, power for the people  
Power, power for the people  
Power, power for the people  
The Atom Makes us Strong

### **Verse 3**

Power that is always on, affordable and clean.  
Enough to last a million years just think what  
that would mean:  
Our needs and aspirations met, no smoke-  
stacks to be seen.  
And Nuclear shows the way.

### **Chorus (together)**

Nuclear Power Holds the Key to Universal Prosperity  
It is Nuclear Energy we must embrace  
For the human race  
And if we save it, history will show  
It was the right way to go.
